Professional Summary

Computer Science undergraduate focused on AI Engineering and software development, with hands-on experience building LLM-powered applications and full-stack systems. Experienced with Python, C++, JavaScript, React.js, Node.js, REST APIs, MongoDB, LLM APIs, prompt engineering, structured outputs, RAG fundamentals, and PDF/document processing. Strong DSA foundation with 150+ LeetCode problems solved.

Technical Skills

AI Engineering: LLM APIs (Groq/OpenAI), Prompt Engineering, Structured Outputs, RAG Fundamentals, PDF Parsing, Embeddings & Retrieval Concepts

AI/ML: Python, NumPy, Pandas, Scikit-learn, OpenCV, Computer Vision

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Python, Node.js, Express.js, REST APIs, JWT Authentication

Database: MongoDB, MySQL

Tools & Deployment: Git, GitHub, VS Code, Postman, Vercel, Render

Experience

Cybersecurity Intern — Gramax | 7-week internship | GMR Group / Udaan Bhavan, IGI Airport

- Created a Chrome extension to automate the extraction of SOC incident data from CrowdStrike into Excel
- Worked on cybersecurity-focused technical tasks involving SOC concepts and security tooling, and prepared technical documentation on Generative AI and enterprise security concepts.

Projects

AI Resume Analyzer *Deployed:* <https://ai-resume-analyzer-two-ruby.vercel.app/> *React.js, Node.js, Express.js, MongoDB, OpenAI API, pdf-parse* | *MERN + AI*

- Developing a MERN-based web application that analyzes resumes and provides ATS compatibility scores and keyword optimization suggestions
- Integrated Groq API to generate personalized feedback based on job descriptions
- Built backend using Node.js and Express with MongoDB and implemented PDF parsing for resume extraction

DSA Problem Tracker | *Live* — github.com/keertan07/DSA-Tracker *JavaScript, HTML, CSS, Local Storage* | *Frontend — Rebuilding in React*

- Built and deployed a DSA progress tracker on GitHub Pages — log problems by topic, difficulty, and status with local persistence across sessions.
- Organically received engagement on LinkedIn from developers using it for their own prep; validates real-world utility.
- Currently rebuilding in React with component architecture, useState hooks, and filter/search functionality.

Face Recognition Attendance System

Apr 2025 – May 2025 Python, OpenCV, face-recognition, NumPy, CSV

- Built real-time webcam-based face recognition system automating attendance marking and eliminating manual tracking.
- Implemented face detection, encoding, and matching pipeline with timestamped CSV logging for auditable, automated records.

Education

Sharda University — B.Tech in Computer Science

2023-present Greater Noida, India

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering, ML Fundamentals, Artificial Intelligence, Web Technologies

Certifications

- Supervised Machine Learning — Stanford University
- Web Development Bootcamp — Udemy
- AI Foundation Associate — Oracle
- Project Management, Planning & Execution — NPTEL

Leadership and Achievement

Management Team Member | OWASP Student Chapter, Sharda University *2024-2025* cybersecurity competitions and workshops for 100+ student participants.

Member | ONC Sharda University (Open Source Community) — Industry Connect Team
